## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-3, 5-22, 25-34, and 36-43 are allowed.

The following is an examiner's statement of reasons for allowance:

As for claim 1, the prior art fails to teach or disclose a pyramidal collector mounted onto an emitter over its emitting surface wherein the shape and size of the proximal end are different from that of the distal end, and wherein a figure having the shape and size of the proximal end can be completely enclosed within a geometrical figure having the shape and size of the distal end.

As for claim 16, after further consideration of the prior art references and the arguments filed, claim 16 is allowable because the applicant's arguments are convincing in that the Tiao reference fails to teach light pipes that are parts of the light source modules and fails to teach that the shape and size of the proximal end are different from the shape and size of the distal end. The prior art fails to teach or disclose the limitations mentioned above with an illumination target and a system of optical elements between the light source and the illumination target.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
